IN REPLY REFER TO: 4410-2

Mr. Theodore J. Harris
2718 N. Meade Street
Appleton, Wisconsin 54911

Dear Mr. Harris:

We have received two letters from you in reference to orders issued to Mr. James Lehrer and Mr. Harold Van Handel concerning plans for their landfill sites. An order has been issued requesting that preliminary plans be submitted within 120 days. These deadline dates have passed and no preliminary plan information has been submitted. Therefore, the Solid Waste Management Section cannot make recommendations to grant these extensions. We need more justification as to why they should be granted. For this reason, we are requesting that two meetings be set up on January 27, 1976, in the Lake Michigan District Headquarters, 812 South Fisk Street, Green Bay, Wisconsin, to discuss with you and your clients the orders, work completed and justification for the granting of these extensions. We would like to meet with you and Mr. Lehrer at 10:00 A.M. to discuss these plans, and with you and Mr. Van Handel at 11:00 A.M. on that date. If these times and dates are acceptable, I would appreciate confirmation.

If there are any questions concerning this matter, please feel free to contact me at our Green Bay office, 414-494-9601.

Very truly yours,

DEPARTMENT OF NATURAL RESOURCES
Environmental Protection

Gary F. Kulibert

RECEIVED DNR
JAN 12 1976
Lake Mich. Dist.

Attention: Mr. Gary Kulibert

Subject: Lehrer Solid Waste Disposal Site,
Kaukauna, Wisconsin.

Gentlemen:

Reference is made to your letter dated August 26, 1975 to Mr. James Lehrer containing a special order by your Department regarding operations of above subject.

In the referenced letter it was stated that the recipient shall, within 120 days, submit to your Department a preliminary engineering plan and study on the above subject site. Subsequent to receipt of the referenced letter several meetings were held with the owner, engineer, surveyor and soil testing personnel to discuss the details of the work to be accomplished to complete the study and report. The topographic survey was accomplished during the weeks of November 10, 1975 and November 17, 1975. Soil Testing Services of Wisconsin completed the necessary field work for the preliminary study during December, 1975 and are presently working on the findings and reports of thier field investigation.

Assuming that we have no further delays in obtaining the necessary field work and that the information from Soil Testing Services is forthcoming, we propose to complete the preliminary study and submit it to your office by the end of next month.

It is therefore requested that you grant an extension of time to February 29, 1976 for submittal of the Lehrer preliminary engineering plan and hydrogeologic feasibility study.

Sincerely,

HARRIS & ASSOCIATES, INC.

Theodore J. Harris
